

THE TRUTH ON TOBACCO

WORLD'S WORST ACTIVE WEAPON OF MASS DESTRUCTION

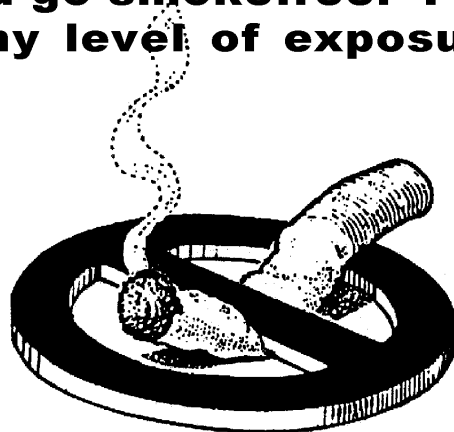

The tobacco industry commits 'A CRIME AGAINST HUMANITY' by marketing a product that kills more than five million people a year worldwide and leaves millions more sick and dying. It is predicted that tobacco will kill over 500 million of today's existing population.

Tobacco contains tar, a dangerous carcinogen, and nicotine, a highly addictive poison. Both ruin health and wellbeing whether inhaled directly or indirectly.

The tobacco industry is immoral and unethical. All governments, retailers, film producers and promoters (eg Formula One organisers) who support this product are helping addict another generation. Smoking in films, DVDs and videos needs to be given an R rating.

Boycott bars and clubs and all other enclosed public places until they comply with Occupational Health and Safety requirements and go smokefree. Please protect all children from any level of exposure to tobacco and smoking.
